DHIS2 Academies

Overview and Introduction

DHIS2 Level 1 Trainings

www.dhis2.org/academy

Revised Training Curriculum:
- Customization
- Information Use
- Tracker

Customization Academy

- Focus on more detailed aggregate DHIS2 customization processes
- Includes advanced discussion on data elements, organization units, data sets, indicators and creation of reporting outputs
- Configuring data quality, data approval, user access and compartmentalizing DHIS2 will be covered
- Importing data and advanced use cases will be demonstrated

Information Use Academy

- Promote the use of information systems as a tool for decentralized program management
- Provide participants with a thorough understanding of data use (mining and visualization) mechanisms in DHIS 2
- Discuss data-use best practices and provide real experiences using data to make decisions
- Provide participants with a thorough understanding of data quality monitoring tools and mechanisms
- Define core system structures that need to be in place for any information system

Tracker Academy

- Management and use of event and tracker programs
- Event and tracker program data model in detail
- Event and Tracker web and mobile apps
- Creation of event and tracker programs
- Creation and implementation of:
  - Program Rules
  - Program Indicators
  - Program Reminders
